

NETWRIX WINDOWS SERVER CHANGE REPORTER 4.0 RELEASE NOTES

This document provides a list of currently known issues that customers may experience with NetWrix Windows Server Change Reporter 4.0. For each issue the list includes an ID, a brief description and a workaround for the problem.

Table 1: NetWrix Windows Server Change Reporter 4.0 Issues

ID	Description	Workaround
10530	If the product is installed on a computer running Windows XP SP3, and the target computer is specified as "localhost", no audit data will be collected.	This is a known issue described in the following Microsoft KB article: http://support.microsoft.com/kb/254210 As a workaround, specify the FQDN/IP address/NETBIOS name of the target computer.
12740	If the product is installed on a computer running Windows XP/2003, and you browse for an Active Directory container when adding items to your Computer Collection, trusted domains will not appear in the list of AD containers you can choose from. Child domains of trusted domains will not appear in this list regardless of the OS version on the computer where the product is installed.	Use a different choice option (computer name/IP address range/import from file) to specify target computers.
12743 12765 12795 13365	The following changes will be reported with the "System" value in the "Who Changed" column: <ul style="list-style-type: none"> • Creation of new scheduled tasks on computers running Windows 2003. • Renaming a scheduled task on computers running Windows XP/2003 if no other parameters are modified for the renamed task. • Changes to child registry keys (i.e. the keys that other keys link to). • Renaming a network connection on computers running Windows XP/2003 (for Windows Vista/7/2008/2012, 	This is going to be fixed in the future product versions.

	<p>the “Who Changed” column will contain the target computer name).</p> <ul style="list-style-type: none"> • Creation of a new registry key if no value has been set for it. 	
12745	<p>Software upgrade is reported by the product as two consecutive changes: software removal and software installation. The entry for software removal will have the “System” value in the “Who Changed” column.</p>	<p>Look for the user name in the entry for software installation to determine who performed the upgrade.</p>
12936	<p>No audit data is collected from computers running Windows XP/2003 if they are specified in the target computer collection as CNAME records.</p> <p>If NetWrix Windows Server Change Reporter is installed on a computer running Windows XP/2003, the product will be unable to collect audit data from target computers specified as CNAME records regardless of their OS version.</p>	<p>Specify the actual name of the target computer.</p>
