

# Netwrix Auditor for NetApp

Complete visibility into what's going on across your NetApp filer appliances

Netwrix Auditor for NetApp facilitates strong **data access governance** and better data management by delivering complete visibility into permissions structure, data ownership and data usage, file activity, and **user behavior** across your NetApp filers. It provides **security intelligence** about who has access to what, who owns what data, which data is overexposed, whether there has been any anomalous activity, which files are stale, and more.

## DETECT DATA SECURITY THREATS

Netwrix Auditor for NetApp delivers visibility into suspicious changes and data access, anomalous user behavior, excessive access rights, and more. This deep insight enables IT teams to more effectively detect security incidents and prevent data breaches.

## PASS COMPLIANCE AUDITS WITH LESS EFFORT AND EXPENSE

The solution provides reports mapped to the most common compliance regulations, including PCI DSS, HIPAA, SOX, GLBA, FISMA/NIST, CJIS and GDPR. You can also use the Interactive Search feature to create custom reports and quickly answer auditors' questions.

## INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Netwrix Auditor for NetApp simplifies report creation and automates report delivery to facilitate regular review. You can proactively detect, investigate and remediate unwanted changes — such as the accidental deletion of critical data — before the change disrupts the business.

## CUSTOMER FEEDBACK

"We use Netwrix Auditor to protect all data, including sensitive information, across all network shares and file servers. We monitor everything that happens with data, who has access to files, and who modifies or deletes them. This enables the IT team to ensure the confidentiality of protected data, and also to hold employees accountable for accidental or purposeful file deletions."

Doug Schreiner, Systems Technical Resource Analyst, Fresno City College

# Key Features of Netwrix Auditor for NetApp

## CONTROL OVER DATA ACCESS

Regular reporting on successful and failed file and folder reads empowers you to monitor access to your sensitive data and ensure no unauthorized access attempt goes unnoticed.

## VISIBILITY INTO USER ACTIVITY

Insight into changes on your NetApp filers — including what was changed, who made the change, when and where the change occurred — helps you spot activity that could threaten both data security and business continuity.

## HOW IS NETWRIX AUDITOR FOR NETAPP DIFFERENT?

### NON-INTRUSIVE ARCHITECTURE

Operates without agents, so it never degrades system performance or causes any downtime.

## FILE ANALYSIS

File analysis reports help you make better data management decisions by providing valuable information about data ownership, data usage, empty folders, and duplicate or unused files.

## ALERTS ON THREAT PATTERNS

Predefined and custom alerts on threat patterns keep you informed about suspicious events, such as too many file modifications or failed access attempts, so you can quickly respond to data security threats.

### TWO-TIERED DATA STORAGE

Keeps your entire audit trail for over 10 years in a reliable and cost-effective two-tiered (file-based + SQL database) storage and ensures easy access to it throughout the whole retention period.

## CONTROL OVER PERMISSIONS STATE

State-in-Time™ reports enable regular privilege attestation so you can validate that permissions are aligned with employees' roles and conform to a known good state. You can also easily compare current and past permissions states.

## INTERACTIVE SEARCH

With the Interactive Search, you can quickly find the exact information you need, whether it's all the actions of a certain user or all activity related to a particular file or folder. You can save your searches as custom reports for future use.

### RESTFUL API

Integrates with other security, compliance and IT automation tools, as well as third-party applications, to expand visibility to other systems and solidify the security of your data regardless of its location.
