

NetWrix All-in-One Suite

Integrated suite for security and compliance that includes all NetWrix products

Product Overview

Organizations that seek a comprehensive, all-in-one, conveniently licensed and easy to install and manage solution that will empower organizations to monitor and command all resources within the IT infrastructure will need the NetWrix All-in-One Suite. With this suite, you gain enterprise wide visibility and control. By leveraging SQL Server Reporting Services and our innovative data collection and storage capabilities, you gain a detailed audit trail over your daily changes.

Also included and equally important to managing the environment are identity management capabilities to efficiently manage user identities and health monitoring tools to round out a complete package for managing critical and ever changing dynamic environments. NetWrix All-in-One Suite was combined to provide outstanding value by including nearly all products offered by NetWrix.

Platforms Covered by NetWrix All-in-One Suite

- Active Directory
- Windows Servers
- Exchange
- NetApp
- File Server
- VMware vSphere and ESX
- Virtual Machine Manager
- SQL Server
- SharePoint Server
- Network Devices
- EMC
- Google Apps

Key Benefits

- **Single solution covering a broad array of systems** including technology from Microsoft, VMware, NetApp, EMC, Cisco and more with monitoring and management capabilities
- **Single integrated platform** with multiple modules show **who** changed **what, when** and **where** in detailed e-mail, web reports with alert capabilities
- **Total enterprise visibility** shows all changes and manages nearly any sized environment
- **Extended application audit coverage** for applications with limited, confusing or entirely missing audit information
- **Cost savings of up to 50%** over competing bundled solutions that lack depth or coverage in managing multiple aspects of the environment
- **Sustain compliance** internally and externally through detailed reports and management tools
- **SIEM integration** protects current investments in preexisting systems
- **Rollback capability** recovers negative and unwanted changes without downtime to Active Directory, Group Policy and Files
- **Identity management tools to facilitate frequent tasks** like managing forgotten and expiring passwords, user account de-provisioning and monitoring user logon events
- **Scalable to quickly deploy auditing and manage the health of systems** throughout today's most diverse environments
- **Easy to use** without additional training or resources
- **Administrative oversight** allows monitoring of admin changes and actions

Key Features

- **Audit, manage and monitor** the most platforms and systems for a single fixed cost
- **Real-time reporting and alerts** to keep you informed of critical events throughout the enterprise
- **3rd-party SIEM support**, including SCOM to protect investments and reduce console sprawl
- **Powerful storage options** to facilitate historical reporting and auditing up to 7 years or more
- **Before and after values** to fully understand each change on a broad range of systems and devices
- **Predefined and custom reports** with Subscription Capabilities leveraging SQL Reporting Services and over 200 valuable compliance and security reports
- **Active Directory Object Restore** – undo any AD change without having to restore from backup or down a Domain Controller unlike native tools
- **Convenient licensing** by Active Directory user
- **Identity management features** including lockout investigation and password management
- **Monitor system and hardware health** to ensure stability and operating efficiency of nearly all IT assets
- **Protected investment** means when NetWrix releases any new products you receive them at no added cost

Action	Object Type	Who Changed	What Changed	When Changed
Modified	OrganizationalUnit	WIDGETS\JSmith	'local\widgets\finance	7/29/2009 8:44:25 PM
Object Security added: Permissions: WIDGETS\Finance (Allow: Delete subtree, List object, Read permissions, Read all properties, Modify Permissions, Write all properties, Delete, All validated writes, List contents, Modify owner, Delete all child objects, Create all child objects, All extended rights)
