

Identity Management

Strengthen security, ensure compliance, and simplify identity management.

Netwrix Identity Management helps organizations identify, manage, and govern identities across hybrid environments. By automating provisioning, group management, and password management while enforcing role-based access control (RBAC), it reduces security risks and IT workload. With full visibility into identities and access, organizations can prevent privilege creep, enforce least privilege, and streamline audits—securing their environment while improving operational efficiency.

AUTOMATED IDENTITY GOVERNANCE & COMPLIANCE

Automate user lifecycle management, access certification, and policy enforcement to reduce security risks and pass audits faster.

ENHANCED SECURITY & LEAST PRIVILEGE ENFORCEMENT

Enforce least privilege by eliminating over-provisioned accounts and controlling access through precise group management.

OPERATIONAL EFFICIENCY & SELF-SERVICE

Reduce IT workload by enabling self-service access requests, delegation, automated workflows, and self-service password resets.

Netwrix is the perfect digital identity management tool. It has helped our company tremendously in managing our digital identities.

Safeguard your Identities

WHY NETWRIX?

IDENTITY LIFECYCLE MANAGEMENT

Automate identity processes from onboarding to offboarding with policy-based workflows for provisioning and de-provisioning. Streamline identity and access management by enabling RBAC through robust role definition and role mining. Reduce manual effort, minimize errors, and ensure users have the right access at the right time.

ENTITLEMENT MANAGEMENT

Manage and control access entitlements across the organization, ensuring that permissions are granted based on roles and responsibilities. Reduce the risk of unauthorized access, enhance security, and achieve compliance.

SEGREGATION OF DUTIES

Ensure that no single individual has control over all critical aspects of any transaction or process, reducing the risk of fraud and errors. Enhance security and meet compliance standards by enforcing proper checks and balances.

ACCESS CERTIFICATION (ATTESTATION)

Review and certify access rights regularly to ensure that users only have access to what they need. Reduce the risk of excessive permissions and potential security breaches while ensuring compliance with regulatory requirements.

GROUP LIFECYCLE MANAGEMENT

Minimize manual intervention by automating the processes of creating groups, updating membership, and managing access control. Maintain an organized directory structure and prevent unnecessary access accumulation over time.

SUPPORT FOR ACCESS REQUESTS

Automate and delegate the process of access requests. Reduce the time and administrative effort needed to manage access. Minimize manual work to reduce errors and achieve significant cost savings.

STREAMLINE COMPLIANCE

Enforce password complexity, expiration, prevent password reuse and block compromised credentials. Reduce the risk of credential-based attacks, strengthen security, and ensure compliance.

AUDITING AND REPORTING

Gain comprehensive auditing and reporting capabilities to track all identity and access changes. Streamline the audit process and fulfill compliance requirements with detailed and easily accessible records.

FASTER DEPLOYMENT & LOWER TCO

Get up and running quickly with out-of-the-box governance and automation, reducing time-to-value and implementation costs.

FLEXIBLE DEPLOYMENT OPTIONS

Designed for on-prem, cloud, and hybrid environments, ensuring scalability and adaptability for evolving business needs.

COMPREHENSIVE IDENTITY GOVERNANCE WITHOUT COMPLEXITY

Automate identity lifecycle processes, enforce role-based access control (RBAC), and simplify compliance with continuous monitoring.
