

Netwrix Auditor for Active Directory

Complete visibility into what's happening in your Active Directory and Group Policy

Netwrix Auditor for Active Directory improves your organization's security posture by delivering **complete visibility** into what's happening in your Active Directory and Group Policy. The application provides **security analytics** that help you detect anomalous user behavior, identify potential insider threats, efficiently investigate and report on security incidents before a breach occurs, and demonstrate that your organization is compliant with regulatory standards.

DETECT INSIDER THREATS

Netwrix Auditor for Active Directory delivers visibility into all security and configuration changes in Active Directory and Group Policy, privilege escalation, anomalous administrator activity, suspicious user logon attempts, and more. This deep insight enables IT departments to more effectively detect security incidents caused by insider actions.

PASS COMPLIANCE AUDITS WITH LESS EFFORT

Netwrix Auditor for Active Directory provides out-of-the-box reports aligned with many compliance regulations, such as PCI DSS, HIPAA, SOX, GLBA, FISMA/NIST, CJIS, GDPR and others. The Interactive Search feature helps you generate custom reports and quickly answer auditors' questions.

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Netwrix Auditor for Active Directory helps minimize service downtime by enabling administrators to quickly uncover the root causes of problems and roll back unwanted changes to their previous states. Furthermore, Netwrix Auditor for Active Directory automates change control and reporting tasks, which increases operational efficiency and quality.

CUSTOMER FEEDBACK

"Netwrix Auditor provides us with daily reports on all activities in AD, including those of the privileged users. By enabling visibility into what is happening in our IT environment and allowing us to be proactive, Netwrix Auditor really strengthens security and makes our job so much more efficient. "

Michael Jensen, Director of Information Technology, Mid Carolina Credit Union

Key Features of Netwrix Auditor for Active Directory

ALERTS ON THREAT PATTERNS

Customizable alerts notify you about critical Active Directory security events as they happen, so you can quickly remediate improper changes and investigate suspicious logon attempts that put your environment at risk.

LOGON AUDITING

Continuous reporting on both successful and failed logons in Active Directory enables you to detect access violations, validate your access controls, and comply with the requirements of many security standards, laws and regulations.

DETAILED AUDIT REPORTS AND DASHBOARDS

Predefined reports and dashboards keep you informed about all changes to users, groups, OUs, DCs, and other objects, properties, settings and permissions. Subscriptions automate report delivery to email addresses or shared folders, according to the schedule you define.

INTERACTIVE SEARCH

The Google-like search provides the flexibility needed to speed your security or compliance investigations. Supply your unique search criteria and quickly find the exact audit information you need.

ACTIVE DIRECTORY CONFIGURATIONS

Reports on Active Directory and Group Policy configurations help you make sure that group membership, effective permissions, password policies and other critical controls are in line with a known good baseline, so you can mitigate cyber risks and enforce good IT hygiene.

CHANGE ROLLBACK AND OBJECT RESTORE

Netwrix Auditor for Active Directory enables you to revert incorrect or unwanted changes to a previous state without the need to restore from a backup or reboot a domain controller.

HOW IS NETWRIX AUDITOR FOR ACTIVE DIRECTORY DIFFERENT?

AGENTLESS ARCHITECTURE

Operates in agentless mode so it never degrades system performance or causes downtime.

TWO-TIERED DATA STORAGE

Offers an exceptionally reliable and cost-effective two-tiered (SQL database + file-based) storage system that keeps a complete audit trail for more than 10 years and ensures easy access to it throughout the whole retention period.

RESTFUL API

Integrates with third-party or your own custom-built applications to expand visibility into your operations, improve security of data and facilitate IT workflows, such as change management, service desk or threat detection.

INTEGRATED IT AUDIT ORCHESTRATION FEATURES

Brings extra value with the built-in features for IT audit and compliance orchestration:

- Inactive User Tracking
- Password Expiration Alerting
