Netwrix Auditor for Network Devices

Know what's going on across your network devices

Netwrix Auditor for Network Devices delivers complete visibility into activity around **Cisco, Fortinet, Palo Alto, SonicWall, HP and Juniper** devices. Its security intelligence enables you to quickly detect and investigate threats to your **perimeter security**, such as unauthorized changes to configurations, suspicious logon attempts and scanning threats. It also provides detailed information about hardware malfunctions and remote access to your network.

DETECT SECURITY THREATS

Spot and investigate improper configuration changes, suspicious logon attempts, scanning threats and more — before they lead to network security breaches or business disruptions.

PASS COMPLIANCE AUDITS WITH LESS EFFORT AND EXPENSE

Slash audit preparation time with hard evidence proving that your security controls are working as expected, and easily answer ad hoc questions from auditors.

INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Minimize the time and effort spent on regular monitoring of activity around network devices, incident investigation and routine reporting to stakeholders.

CUSTOMER FEEDBACK

"I love the reports. The product fulfills one of my DoD DFAR requirements to monitor remote access sessions. The log shows all VPN activity from my Cisco ASAs. Nice job, guys!"

Michael Nedbal, Chief Information Security Officer
Makai Ocean Engineering, Inc.

Key Features of Netwrix Auditor for Network Devices

VISIBILITY INTO LOGON EVENTS

Keep an eye on successful and failed logons to your network devices, including VPN logons. Spot suspicious activity and respond in time to prevent security breaches.

HARDWARE MONITORING

Gain complete visibility into hardware issues so you can quickly spot hardware malfunctions, determine the root cause and take appropriate action to ensure stable network performance.

INTERACTIVE SEARCH

Quickly determine the root cause of an incident, such as a network device shutting down or an unauthorized password reset on a router, by sorting through your audit trail and fine-tuning your queries with a Google-like search.

CONTROL OVER CONFIGURATION CHANGES

Easily spot changes to the configuration of your network devices and improper activity that weakens perimeter security. Hold individuals accountable for their actions.

ALERTS ON CRITICAL EVENTS

Be notified about unusual changes, suspicious logon attempts, high data traffic, scanning threats and hardware issues so you can respond before they turn into security breaches or lead to downtime.

READY-TO-USE COMPLIANCE REPORTS

Slash the time required for compliance preparation with out-of-the-box predefined reports. Quickly provide evidence to auditors that you know what's happening around your network devices and have control over logon sessions.

HOW IS NETWRIX AUDITOR FOR NETWORK DEVICES DIFFERENT?

NON-INTRUSIVE ARCHITECTURE

Collects audit data without the use of any intrusive services, so it never degrades system performance.

TWO-TIERED DATA STORAGE

Stores your entire audit trail for over 10 years in a cost-effective two-tiered storage and provides easy, secure access to it throughout the retention period.

RESTFUL API

Integrates with other IT tools so you can easily expand visibility to other systems and have your entire audit trail available from a single place.
