

# Netwrix Auditor for SharePoint and Teams

## Identify and mitigate security risks in SharePoint and Teams

Harden the security of your SharePoint and Teams environments with complete visibility into data risks, suspicious changes, reads and modifications of sensitive documents, and more. This security intelligence helps you detect suspicious user behavior and investigate security incidents before they result in data leaks, compliance failures or downtime.

### SPOT AND FIX DATA SECURITY ISSUES

Identify and mitigate risks around sensitive data before they turn into a breach by getting deep visibility into data sensitivity and spotting overexposed content. Detect and investigate suspicious user behavior to minimize the impact of security incidents.

### PASS COMPLIANCE AUDITS WITH LESS EFFORT

Streamline compliance using out-of-the-box reports aligned with GDPR, PCI DSS, FISMA/NIST, HIPAA and many other regulations. Quickly address ad-hoc questions from auditors with the intuitive Google-like search.

### INCREASE THE PRODUCTIVITY OF YOUR IT TEAMS

Empower your IT teams to quickly uncover, investigate and remediate critical changes by eliminating the need to dig through cryptic native logs and manually correlate events. Save even more time with simplified and automated reporting.

## CUSTOMER FEEDBACK

“We went from spending days figuring out what is wrong to detecting the issue in a couple of minutes. Thanks to Netwrix Auditor, now we are more comfortable with moving sensitive data from our file servers to SharePoint Online, which will contribute to our productivity and save storage.”

James Mountain, Director of Information Security  
Palmer College of Chiropractic

# Key Features of Netwrix Auditor for SharePoint and Teams

## INSIGHT INTO RISKS AROUND SENSITIVE DATA

Focus on the most pressing data security gaps by finding sensitive data at risk and ensuring it resides only in safe locations and is accessible only to authorized personnel. Data sensitivity context is available only in conjunction with Netwrix Data Classification.

## CONTROL OVER PERMISSIONS

Get deep insight into who has access to what in SharePoint and Teams, and make it easy for data owners to verify that access regularly. See all teams with their members and owners so you can be sure that only authorized users can access critical documents.

## ALERTS ON CRITICAL ACTIVITY

Know right away about security threats around sensitive data in SharePoint and Teams with customizable alerts, so you can respond before they result in a security breach.

## REPORTING ON DATA ACTIVITY

Keep tabs on who viewed, modified or deleted which documents and lists on your SharePoint and Teams, including external or anonymous users. See when and where each event occurred so you can make sure no one is accessing files they shouldn't access.

## VISIBILITY INTO CRITICAL CHANGES

Stay confident in the security of your SharePoint and Teams environments by knowing about all changes to configuration and security settings, including the crucial who, what, when, and where details.

## INTERACTIVE SEARCH

Quickly sort through the audit trail whenever you need to investigate a security incident or find out who made improper modifications in SharePoint or Teams.

## HOW IS NETWRIX AUDITOR DIFFERENT?

### CLOUD FRIENDLY

Supports on-premises SharePoint as well as SharePoint Online and Teams, so you can easily monitor your on-prem, cloud or hybrid IT environment.

### NON-INTRUSIVE ARCHITECTURE

Collects audit data without the use of any intrusive services, so it does not degrade system performance or cause downtime.

### TWO-TIERED DATA STORAGE

Stores your entire audit trail for over 10 years in a reliable and cost-effective two-tiered (file-based + SQL database) storage and provides easy access to it throughout the whole retention period.

### RESTFUL API

Integrates with other security, compliance and IT automation tools, so you can easily expand visibility to other systems and have your entire audit trail available from a single place.
