

Netwrix Password Secure

Password Security and Management Made Easy

Insecure password practices are a top vector for adversaries to slip into your IT environment. Strengthen data security, enhance your compliance posture, and improve user productivity by securely storing and managing login credentials across your organization. Reduce the burden on IT teams by enabling them to monitor password usage and prove compliance from a single console. Password Secure is an essential tool for businesses to protect against cyber threats, improve efficiency, and simplify password management.

STRENGTHEN SECURITY

Cloud-based password managers have proven to be insecure and have become a popular target for hackers. Ensure the safety of your most important secrets by storing them on-premises.

DRIVE PRODUCTIVITY

Make it easy for users to maintain strong passwords and log on in a single click. Empower teams to securely share passwords, keys, profiles, and other confidential information.

SUPPORT FLEXIBLE WORK

Enable users to securely access their passwords — no matter which platform and device they are using. And give IT teams a single console to manage and monitor it all.

CUSTOMER FEEDBACK

“Password Secure takes a lot of pressure off IT: Where employees previously had to remember up to 20 passwords, now one click is all it takes to log in – without the employee even knowing the password.”

Deutsche Plasser

Key Features

EASY ACCESS

Netwrix Password Secure synchronizes passwords across all platforms and devices so users can access them securely from anywhere, even offline, and log in simply by clicking the browser extension.

ROLE-BASED ACCESS CONTROL

With RBAC support, you can define different levels of access to the password database based on the user's role, ensuring that users have access only to the resources they need to perform their job functions.

SIMPLE ADMINISTRATION

Administrators can manage and monitor everything from a single console.

SECURE SHARING

Empower users to securely share passwords, keys, profiles, and other secrets with their teammates — and nobody else.

STRONG PASSWORDS

Identify insecure passwords and prevent users from choosing new passwords that do not comply with your policies.

SATISFY AUDITORS

Every password related event is saved, so proving compliance with today's stringent password requirements is quick and easy with detailed reports on password changes.

HOW IS NETWRIX PASSWORD SECURE DIFFERENT?

SCALABILITY

Netwrix Password Secure is highly customizable to fit your environment and operating practices — and support you as your needs evolve.

FLEXIBILITY

Netwrix Password Secure is managed by your business to meet your needs. It can be installed where you need, on premises or in the cloud but remains 100% under your control with passwords stored on-premises.

FAST ROI

Netwrix Password Secure deploys quickly, across even the largest organizations, with our “configure, don't code” approach.
