

Netwrix Privilege Secure

Address your organization's pam challenges with comprehensive end-to-end security for access management

Our PAM tools can solve access control challenges by creating ephemeral identities for privileged access, reducing the attack surface, and enhancing overall security. They empower your IT and security teams to manage privileged accounts securely while providing accountability and proof for auditors.

ELIMINATE PRIVILEGED ACCOUNT SPRAWL

Identify unmanaged, or unknown, privileged accounts with constant scanning. Stop attackers moving laterally in your environment by disabling unnecessary accounts.

SECURE ACCESS TO PRIVILEGED OPERATIONS

Reduce security risk by implementing a zero standing privilege methodology, secure credentials with granular session monitoring controls.

LOCKDOWN ENDPOINT PRIVILEGE

Prevent the risk of malware, ransomware, and noncompliance by delegating only the permissions standard users need, not local admin rights.

Why Netwrix Privilege Secure:

ZERO STANDING PRIVILEGE

Minimize your attack surface by replacing standing privileges with on-demand accounts and ensure just-in-time access is granted across all platforms, including databases.

SIMPLE LICENSING AND INSTALLATION

Everything you need is included in one license — you won't face extra fees for add-ons for databases, appliances, proxies, high availability or other common needs.

LEVERAGE THE INVESTMENT YOU'VE ALREADY MADE

Ease end-user frustration by facilitating the use of existing desktop clients for RDP and SSH access; integrate with any existing vault solution, including Microsoft LAPS.

Netwrix has been recognized in the Gartner® Magic Quadrant™ for Privileged Access Management for two consecutive years.

Gold Winner
Privileged Access Management

Powerful Data Security Made Easy

Key features for:

DISCOVERY

DISCOVER YOUR BLIND SPOTS IN MINUTES

With Privilege Secure you can scan tens of thousands of endpoints to identify potential footholds for attackers and continuous scanning means no more account sprawl.

IMPLEMENT ZERO STANDING PRIVILEGES

Remove unnecessary administrative accounts from all endpoints in a single click, slashing the risk of malware being installed or critical security settings being altered.

GET VISIBILITY OVER YOUR ATTACK SURFACE

Visualize, analyze and manage your environment with dashboards tailored to executives and IT pros. View all accounts and activity to have situational awareness of privileged activity.

SESSION MANAGEMENT

REMOVE STANDING PRIVILEGE

Privilege Secure creates and disables accounts for each session, leaving attackers with no accounts to compromise. Thanks to Privilege Secure's orchestration engine, all privilege accounts on all systems are ephemeral.

SECURE YOUR CREDENTIALS

Whether it's passwords or secrets, Privilege Secure can manage vaulted credentials natively or integrate with existing vaults.

GET VISIBILITY OVER PRIVILEGED SESSIONS

With full real-time monitoring, session recording, and keystroke analysis, you can quickly discover and remediate malicious activity.

ENDPOINTS

PROTECT WINDOWS ENDPOINTS FROM RANSOMWARE AND MALICIOUS CHANGES

Prevent users from installing unknown software and manage how they use removable storage. Protect application settings from malicious and inadvertent changes and validate that Group Policy settings are deployed correctly.

ACCELERATE PRODUCTIVITY WHEREVER WORK GETS DONE

Deploy software and custom OS settings to any Windows endpoint, whether domain-joined, MDM enrolled or virtual. Consolidate Group Policy objects (GPOs), automate scripts, simplify VPN management and more.

MODERNIZE YOUR DESKTOP ENVIRONMENT

Manage and secure your on-premises, hybrid or remote desktop environment from a single solution.

CUSTOMER FEEDBACK

"We can truly manage the access to our systems to the level of least privilege. The concept of temporary elevation, or just-in-time access, makes so much sense: The admin is granted access on the fly and access is removed when no longer needed."
