MINIMIZE PRIVILEGED ACCESS RISKS

Reduce your attack surface area by discovering and removing standing privileged accounts that can be compromised by attackers.

CONTROL PRIVILEGED ACTIVITY

Reduce the damage from a security incident by detecting suspicious privileged activity and responding to it faster.

PASS AUDITS WITH LESS EFFORT

Avoid audit findings and provide solid proof that privileged activity is not creating security risks with prebuilt reports and easy search.

CUSTOMER FEEDBACK

“We can truly manage the access to our systems to the level of least privilege. The concept of temporary elevation, or just-in-time access, makes so much sense: The admin is granted access on the fly and access is removed when no longer needed.”

Craig Larsen, Information Systems Administrator
Eastern Carver County Schools

Netwrix named a Visionary in the September 2023 Gartner® Magic Quadrant™ for Privileged Access Management.
Key features

PRIVILEGED ACCOUNT DISCOVERY
Get a firm handle on the risk that admin accounts pose to your organization by discovering all human and non-human privileged accounts across your IT environment.

ON-DEMAND PRIVILEGES
Minimize security risk by removing standing privileges. Use temporary accounts with minimal access to specific tasks, automatically deleting them and potential exploit artifacts.

PRIVILEGED ACTIVITY MONITORING
Spot suspicious behavior faster and enforce individual accountability by monitoring, logging and video-recording all privileged activity. Minimize damage by promptly blocking threats and policy violations.

ZERO TRUST PRIVILEGED ACCESS
Validate identities in accordance with Zero Trust principles by enforcing contextual multifactor authentication (MFA) for each privileged session using granular policies tailored to specific actions and resources.

LOCAL ADMINISTRATOR SECURITY
Shut down a common attack vector while still enabling users to perform specific tasks that require elevated privileges on their machines by replacing all-or-nothing local Administrator rights with granular privilege elevation.

COMPLIANCE REPORTING
Be prepared for tricky questions from auditors with an easy-to-pull audit trail of all admin activity, from the initial request for privileged access and who approved it, through all actions taken (including changes to files or local groups), to account deletion afterward.

ZERO STANDING PRIVILEGE
Minimize your attack surface by removing standing privileges in favor of on-demand accounts.

COMPLETE SOLUTION
Improve the security of privileged access with full coverage of critical PAM capabilities.

FASTER TIME TO VALUE
Realize value faster with easy deployment and implementation that is much faster than traditional solutions.

ECOSYSTEM INTEGRATIONS
Leverage previous investments by integrating Netwrix solutions with your existing tools, such as LAPS, your vault or your SIEM.
