

Secure Your Passwords, Secure Your Peace of Mind

More than 8 in 10 data breaches start with compromised credentials. Slash your risk with Netwrix password security solutions! You can easily establish powerful yet flexible policies that make it easy for everyone to use unique, strong passwords for all of their logins — without having to remember any of them. Plus, you can reduce the burden on IT teams and improve business productivity by enabling users to securely manage, reset and even share passwords, anytime, anywhere.

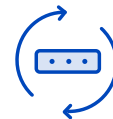

ELIMINATE WEAK PASSWORDS

Reduce the risk of a security breach by enforcing strong, fine-grained password policies and identifying and replacing weak passwords before bad actors exploit them.

SAFEGUARD ALL YOUR SENSITIVE CREDENTIALS

Centrally manage and secure all your sensitive credentials to reduce the risk of data breaches, ensure compliance, and improve efficiency and productivity.

SLASH HELPDESK COSTS AND USER FRUSTRATION

Make it quick, easy and safe for all users to manage, reset and share passwords — without ever having to contact the help desk.

CUSTOMER FEEDBACK

"Finally, we can offer our employees a password management solution that they enjoy using and that provides them with all the features they need."

WIENERZEITUNG

Key Features

WHY NETWRIX?

SECURE STORAGE AND SHARING

Centrally store and manage passwords with strong encryption and role-based access control (RBAC). Empower users to securely share passwords, keys, profiles, and other secrets with their teammates — and nobody else.

COMPLIANCE AND AUDIT READINESS

Ensure that passwords meet industry best practices and compliance requirements; gain visibility and control over password-related activities; and speed audit preparations with a searchable audit trail and prebuilt reports.

COMPLETE SOLUTION FOR TODAY AND TOMORROW

Manage identities through their entire lifecycle. Easily configure policies and workflows to meet your specific needs, and rest assured you can quickly adapt to changing security requirements.

PASSWORD POLICY ENFORCEMENT

Avoid account takeover by enforcing strong password policies that prevent users from choosing weak and leaked passwords — all without hurting user or helpdesk productivity. Check your passwords against a database of compromised credentials at any time.

SECURE AUTHENTICATION

Further thwart attacks with multifactor authentication (MFA), passwordless authentication, automated password rotation, password masking, lockout and timeout capabilities.

YOU'RE IN CONTROL

All your credentials and other secrets remain 100% private and under your control, whether you choose an on-premises or cloud deployment.

SELF-SERVICE WORKFLOWS

Reduce the workload of IT administrators while making business users happy and productive by enabling users to securely reset, manage and share their passwords.

EASY ACCESS

Synchronize passwords across platforms and devices so users can access them from anywhere. Enable users to log in by simply clicking a browser extension and delight them with secure single sign-on (SSO).

ECOSYSTEM INTEGRATIONS

Get the most out of your previous investments by easily integrating Netwrix solutions with your existing tools.

OUTSTANDING CUSTOMER SUPPORT

Have your issues promptly resolved by first-class technical support with a 97% satisfaction rate.
