

CREDENTIAL AND DATA SECURITY ASSESSMENT

stealthbits
NOW PART OF **netwrix**

PROPER DATA SECURITY...

Proper data security begins with a strong foundation. Find out what you're standing on with a deep-dive into the security of your Structured and Unstructured Data, Active Directory, and Windows infrastructure.

DATA

Discover sensitive data, open access rights, high-risk permissions, and stale data that is putting your organization at risk.

CREDENTIALS

Pinpoint vulnerabilities in Active Directory permissions, account passwords, privileged access rights, configurations, objects, and more.

SYSTEMS

Identify privileged access rights, service accounts, critical misconfigurations and conditions attackers exploit to steal credentials.

STEALTHBITS PARTNERS

Are you a Stealthbits Partner? If so, you can run Stealthbits' Credential and Data Security Assessment for your customers too. Give us a shout and we'll schedule training for your team.

WHAT DO YOU GET?

With Stealthbits' Credential and Data Security Assessment (CDSA), you'll receive a full assessment and calculation of risk across some of the most critical and often misunderstood areas of your environment (whether you're completely on-premises, in the cloud, or operating in hybrid mode), including [File Systems](#), [SharePoint](#), [Exchange](#), [Office 365](#), [AWS S3](#), [Box](#), [Dropbox](#), [Microsoft SQL Server](#), [Azure SQL](#), and [Oracle Databases](#), [Active Directory](#), [Azure Active Directory](#), and [Windows](#) Desktop and Server infrastructure.

COMPREHENSIVE VISIBILITY

With 100+ security checks in total, the CDSA identifies critical security conditions and misconfigurations across an organization's on-premises and cloud-based data repositories, Active Directory, and Windows infrastructure.

FAST, NO-IMPACT SCANNING

With no agents to deploy and the ability to run from an existing system located anywhere in your environment, you'll get all the data you need without making changes to your infrastructure or incurring additional costs.

VALUABLE OUTPUT

A detailed Executive Summary highlights where attention is needed most and why, allowing any audience to fully understand the nature of the risks identified and why they're important to remediate.

EXTENSIBLE OPTIONS

Want more? Stealthbits offers a full portfolio of credential and data security solutions. Snap in additional products and take your evaluation to another level, identifying active threats, violations of security and operational policy, and more.
