

# STEALTHAUDIT® FOR ACTIVE DIRECTORY

Comprehensive Active Directory auditing, reporting, and remediation for security compliance, and operations

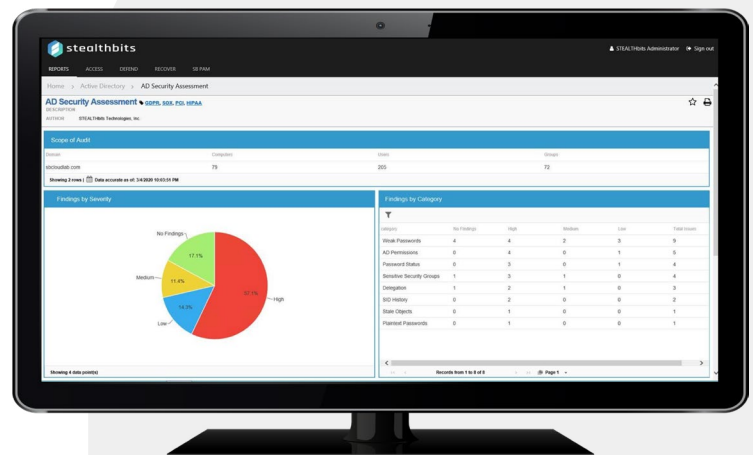

**stealthbits**  
NOW PART OF **netwrix**

As the primary authentication and authorization service for the majority of IT systems, the importance of Active Directory (AD) is not to be understated. Over time, AD has grown increasingly complex, less secure, and more difficult to manage, resulting in a growing problem for organizations large and small.

For over a decade, StealthAUDIT for Active Directory has provided the most comprehensive collection of auditing, analysis, reporting, and remediation capabilities available for Active Directory. Relied upon by the world's largest organizations with the most complex Active Directory infrastructures, StealthAUDIT provides Active Directory, Security, and Identity Management professionals the ultimate AD auditing tool.

## StealthAUDIT FOR ACTIVE DIRECTORY DELIVERS

- **Active Directory Auditing** – Collect information on anything residing in AD, from objects and their attributes to Group Policy Objects (GPOs), configurations, group memberships, domains, sites, trusts, and more.
- **Active Directory Reporting** – Leverage dozens of preconfigured reports or create completely custom reports in seconds using StealthAUDIT's powerful analysis and reporting engines.
- **Active Directory Group Governance** – Calculate and assign group ownership, perform automated membership reviews, and enable self-service group management and membership requests.
- **Azure Active Directory Visibility** – Obtain deep visibility into your Azure Active Directory environment with preconfigured reporting around user and group configurations and conditions, stale objects, synchronization status, and more.
- **AD Administrator Rights Auditing** – Identify every account with privileged access rights within Active Directory, including members of sensitive security groups and other special rights like DSRM Admins.
- **Active Directory Weak Password Analysis** – Analyze every account password to determine how easily each could be compromised or the likelihood their passwords are known through comparison with compromised password dictionaries and more, such as the HaveIBeenPwned database.
- **Active Directory Clean-up** – Pinpoint stale, duplicate, and toxic objects and programmatically clean them up using integrated actions to increase security and reduce complexity.

- **Active Directory Activity Analysis** – Perform bulk, historical, and contextual analysis of Active Directory activity data via integration with StealthINTERCEPT, StealthDEFEND, or Stealthbits Active Directory Activity Monitor.
- **Active Directory Group Policy Auditing** – Easily audit GPOs and their settings, along with analysis of where they've been linked, misconfigurations that can cause security or operational issues, and redundant GPOs that can be consolidated.
- **Active Directory Permissions Analysis** – Collect, inventory, and analyze every permission to every object to understand exactly who has privileged access in Active Directory with StealthAUDIT Active Directory Permissions Analyzer.
- **Automated Compliance Reporting** – Preconfigured and customizable report tags aligning to various compliance standards such as HIPAA, PCI-DSS, GDPR, and SOX automate the production of compliance artifacts.
- **Active Directory Security Assessment** – Preconfigured and customizable security best practices checks proactively identify critical security configurations that leave Active Directory vulnerable to attack.
- **Workflow Composition** – Leverage the full power of StealthAUDIT to automate processes in their entirety, including integration with 3rd party ITSM solutions, such as ServiceNOW.

## IDENTIFY THREATS. SECURE DATA. REDUCE RISK.

Stealthbits Technologies, Inc. is a customer-driven cybersecurity software company focused on protecting an organization's sensitive data and the credentials attackers use to steal that data. By removing inappropriate data access, enforcing security policy, and detecting advanced threats, our highly innovative and infinitely flexible platform delivers real protection that reduces security risk, fulfills compliance requirements, and decreases operational expense.
