

STEALTHAUDIT[®] FOR DROPBOX

Comprehensive Dropbox Business auditing for security and compliance

stealthbits
NOW PART OF **netwrix**

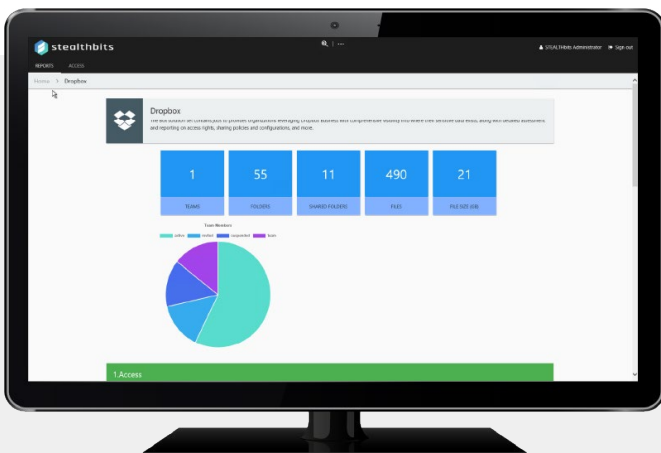

A perennial leader in the content collaboration platform space, Dropbox facilitates secure file storage and sharing for over 500 million users and thousands of organizations worldwide. Dropbox Business accounts are brimming with sensitive files, however, and are only a click away from being accessed by virtually any internet-connected device.

StealthAUDIT for Dropbox provides content-level inspection of the files within Dropbox Business repositories, as well as deep visibility into access rights, sharing policies and configurations, and more, ensuring you never lose sight or control of your critical assets.

StealthAUDIT FOR DROPBOX DELIVERS

Dropbox Sensitive Data Discovery – Scan the contents of over 400 file types to discover which files contain sensitive information of any type, including PII, data subject to regulatory compliance standards, intellectual property, and custom criteria.

- **Dropbox Access & Permissions Auditing** – Understand effective access rights to each Dropbox repository along with valuable views around inactive access rights that can be revoked to ensure and maintain alignment with least privilege principles.
- **Dropbox Sharing Configuration** – Obtain a listing of every shared resource along with sharing policy and owner information on files and folders.
- **Content Analysis** – In addition to data sensitivity, StealthAUDIT for Dropbox also provides analysis of content types and staleness, allowing for proactive management and maintenance according to company policy.
- **Preconfigured Reporting** – Hit the ground running with preconfigured reports focused on group and user access, content ownership, data classification, and more.
- **Workflow Composition** – Leverage the full power of the StealthAUDIT Management Platform to automate processes in their entirety, including integration with 3rd party solutions and internal workflows, soliciting end user feedback, and more.
- **Compliance Fulfillment** – Demonstrate compliance with virtually any standard by automating the generation of compliance artifacts and establishing regular reviews of access rights and data.
