# Security Matters

## Key findings

**87%**  
of respondents say they need up to 50% more cybersecurity budget.

**77%**  
of respondents consider a careless member of staff as the most likely source of attack.

**48%**  
do not have a Security Operation Center, even though they are becoming increasingly common.

**36%**  
of boards have sufficient cybersecurity knowledge for effective oversight of cyber risks.

**12%**  
feel it is very likely they would detect a sophisticated cyber attack.

**63%**  
of organizations still keep cybersecurity reporting mostly within the IT function.

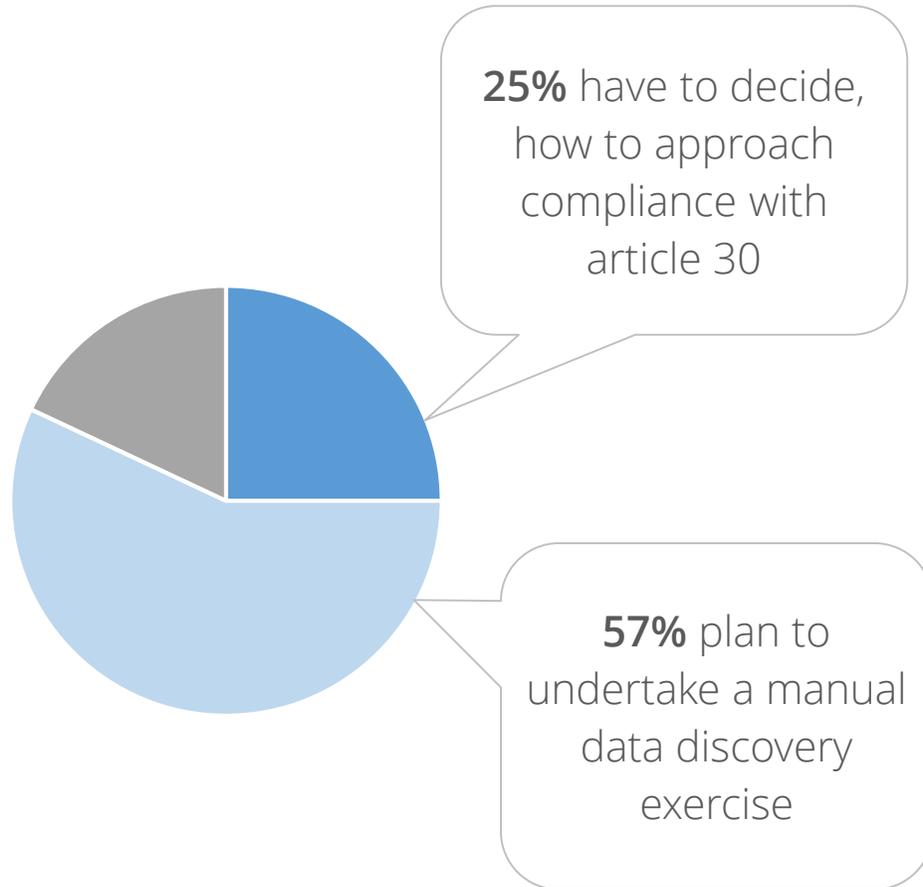

**57%**  
do not have, or only have an informal, threat intelligence program.

**89%**  
say their cybersecurity function does not fully meet their organization's needs.

# The GDPR Compliance

“**Article 30** lends itself well to the use of tooling. Data flow mapping and data inventory tools, both of which would provide support to meeting Article 30, are popular among respondents, with **40% ‘definitely considering’ tools to enable data flow mapping.**”

This indicates that tools will play a significant role in this area of compliance in the future, and organisations can expect use in these specific technologies to grow.”

# Perimeter Protection

Perimeter-based defenses (firewalls, antivirus, antimalware, IDS, distribution of privileges) alone became **significantly less effective** against increasingly adept attacks.

A solid red vertical bar on the left side of the slide.

## Questions to Ask

- What is happening in my IT infrastructure?
- Is my environment secure and ready for compliance audits?
- Who is violating security principles or behaving strange?
- Who has access to what data or systems in my organization?
- What exactly was changed, when and where in my environment, and who must be held accountable?

# About Netwrix Corporation

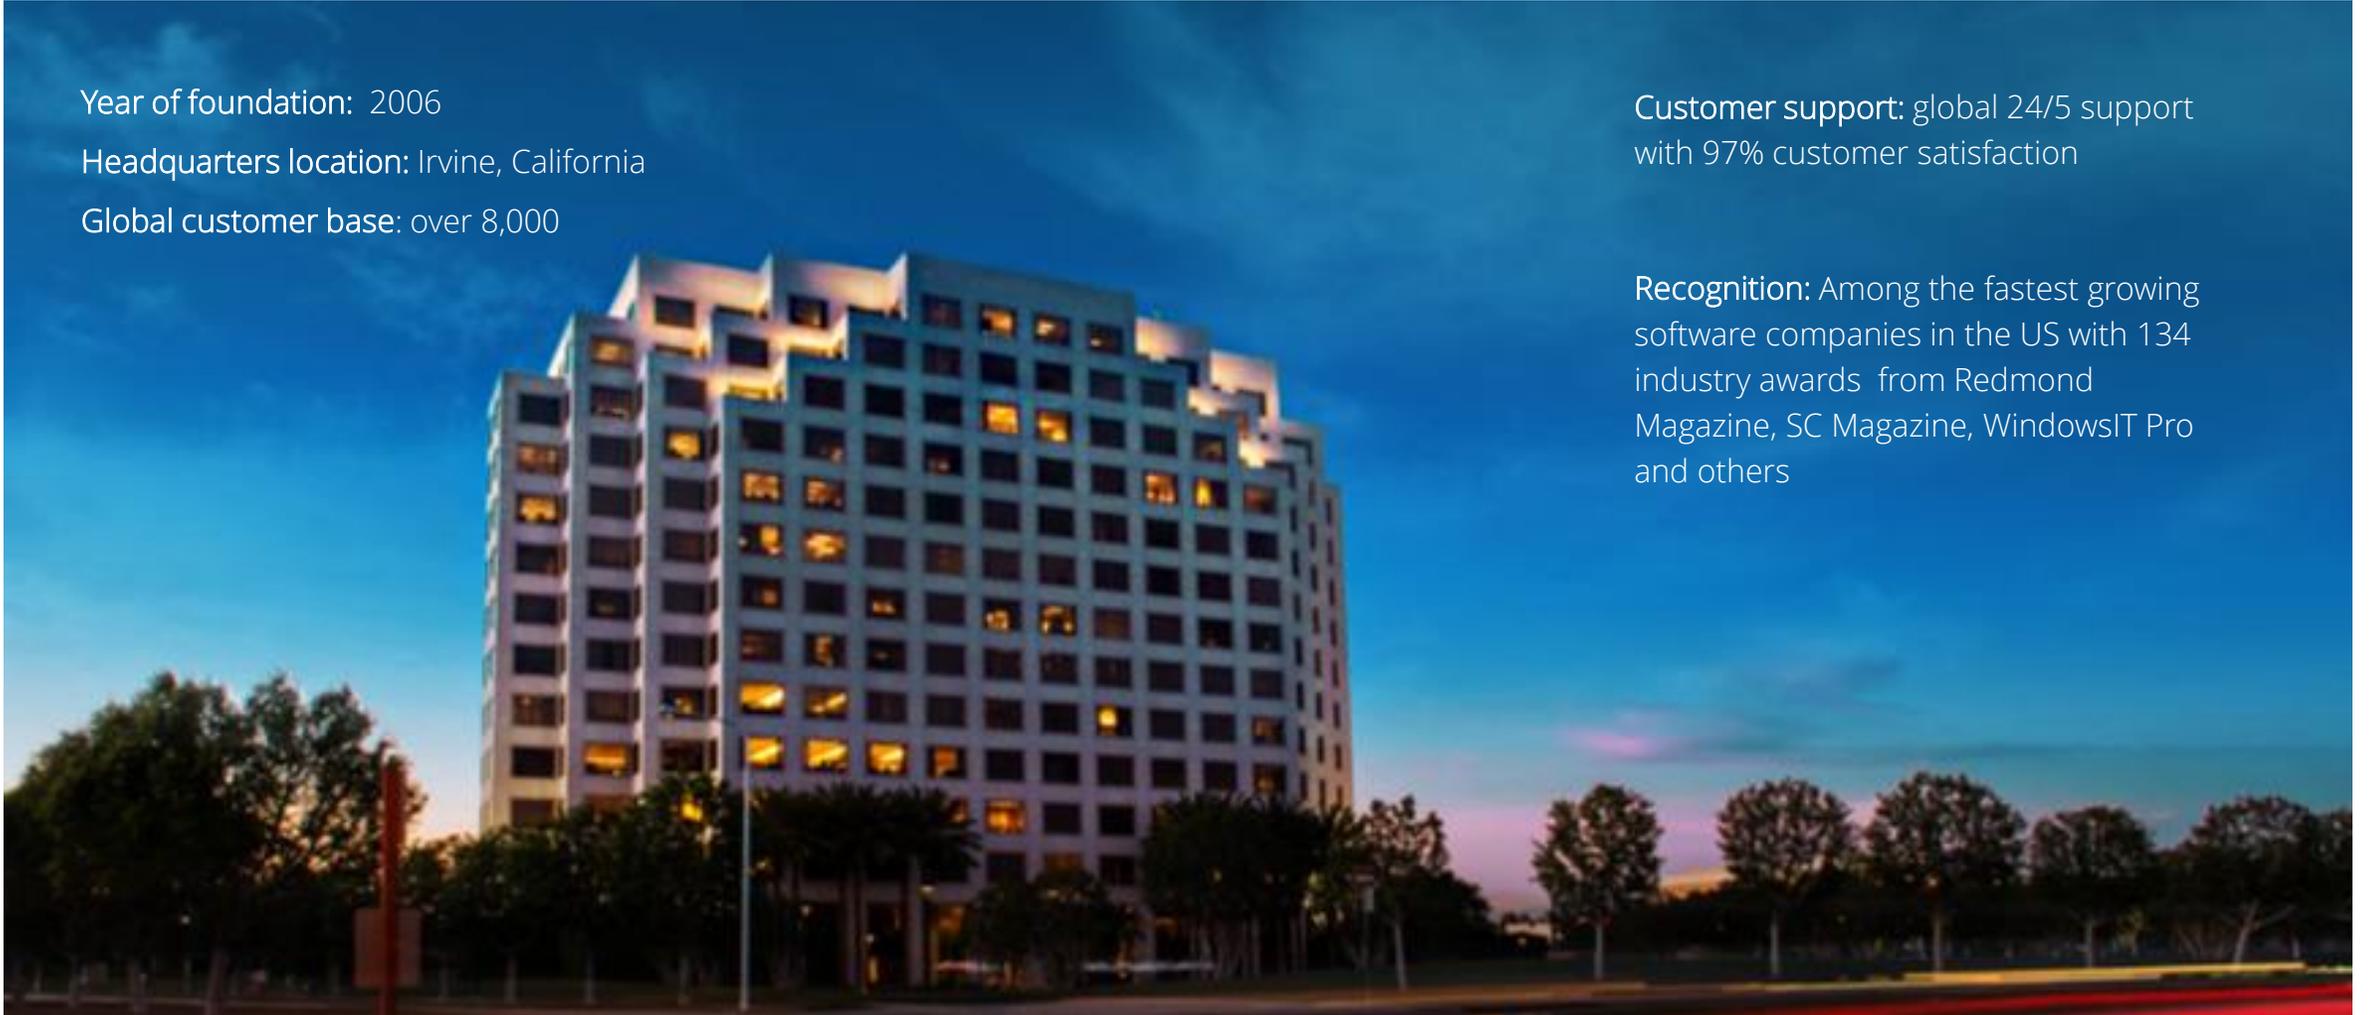

Year of foundation: 2006

Headquarters location: Irvine, California

Global customer base: over 8,000

**Customer support:** global 24/5 support with 97% customer satisfaction

**Recognition:** Among the fastest growing software companies in the US with 134 industry awards from Redmond Magazine, SC Magazine, WindowsIT Pro and others

# Netwrix Auditor Benefits

Detect Data Security Threats, both On Premises and in the Cloud

Bridges the visibility gap by delivering security intelligence about critical changes, configurations and data access in hybrid IT environments and enabling identification of security holes and investigation of anomalous user behavior.

Pass Compliance Audits with Less Effort and Expense

Provides the evidence required to prove that your organization's IT security program adheres to PCI DSS, HIPAA, SOX, FISMA, GLBA, CJIS, FERPA, NERC CIP, ISO/IEC 27001, GDPR and other standards.

Increase the Productivity of Security and Operations Teams

Relieves IT departments of manual crawling through weeks of log data to get the information about who changed what, when and where a change was made, or who has access to what and helps automate software inventory tasks.

# Netwrix Auditor Unified Platform

## Netwrix Auditor Platform

 Netwrix Auditor for <b>Active Directory</b>	 Netwrix Auditor for <b>Azure AD</b>	 Netwrix Auditor for <b>Exchange</b>	 Netwrix Auditor for <b>Office 365</b>
 Netwrix Auditor for <b>Windows File Servers</b>	 Netwrix Auditor for <b>EMC</b>	 Netwrix Auditor for <b>NetApp</b>	 Netwrix Auditor for <b>SharePoint</b>
 Netwrix Auditor for <b>Oracle Database</b>	 Netwrix Auditor for <b>SQL Server</b>	 Netwrix Auditor for <b>Windows Server</b>	 Netwrix Auditor for <b>VMware</b>

# Netwrix Auditor Add-on Store

Facilitate initial incident support and enable faster investigation in **ServiceNow ITSM** to speed incident response.

Detect and investigate security incidents around **Cisco network devices** more efficiently to thwart malicious activity.

Maximize visibility into the actions of **privileged users** across your entire **Linux** and **Unix** environment.

Enrich your **Splunk** output data with actionable details and make your SIEM more cost-effective.

Extend the capabilities of **IBM QRadar** to protect critical information assets from advanced threats.

Detect and investigate threat patterns faster by feeding granular audit data to your **AlienVault USM**.

# Data Discovery and Classification Use Cases

## Prioritize your data protection efforts

Identify the shares with the highest concentrations of sensitive data and detect any PII, PCI, PHI or IP that surfaces outside of a secure location, so you can respond appropriately.

## Minimize the risk of a data breach

Verify that access rights to sensitive data are aligned with corporate policies and applicable regulations, and involve data owners in determining who should be able to access it.

## Detect threats to your sensitive data

Get the full context around activity with protected information and ensure that user actions that threaten this data, such as improper permissions changes, are captured and reported on.

## Prove your security controls are effective

Demonstrate to auditors that you know exactly where protected data resides and quickly provide evidence that only eligible employees can read, modify, share or delete your critical files.

## Accommodate new security regulations

Easily discover the data that GDPR and other compliance regulations require you to protect, and establish a solid foundation for complying with future data security requirements.

## Determine the severity of a data breach

Analyze how much data a malefactor had access to and which pieces of data were actually viewed, modified or deleted, so you can notify all affected parties.

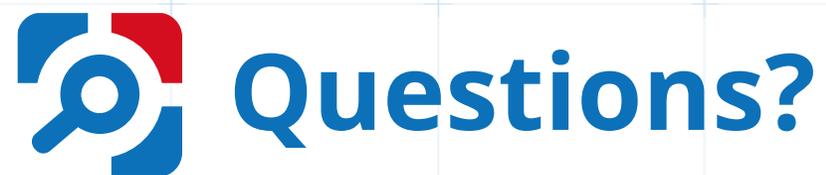

# Netwrix Auditor

## Demonstration

## Next Steps

- **Free Trial:** setup in your own test environment  
[netwrix.com/freetrial](https://netwrix.com/freetrial)
- **Virtual Appliance:** get Netwrix Auditor up and running in minutes  
[netwrix.com/go/appliance](https://netwrix.com/go/appliance)
- **Test Drive:** run a virtual POC in a Netwrix-hosted test lab  
[netwrix.com/testdrive](https://netwrix.com/testdrive)
- **Live One-to-One Demo:** product tour with Netwrix expert  
[netwrix.com/livedemo](https://netwrix.com/livedemo)
- **Contact Sales** to obtain more information  
[netwrix.com/contactsales](https://netwrix.com/contactsales)
- **Upcoming and On-Demand Netwrix Webinars:** join upcoming webinars or watch the recorded sessions
